Out of curiosity, are you going to give us the answers as to which of the people (names listed here) originate from the Kingdom of Khazars? Or is that the point, they all do?

Khazars Note:

Perhaps do some study via the internet, libraries or geneology sources, and discover if any are from West Asia several hundred years or thousands of years ago; or if any are the descendants of Khazars who entered Eastern Europe and thence Western Europe, and other influential places (e.g. London, New York City, San Francisco).

If so, then their family tree is perhaps Khazar, rather than Mediterranean / Arabic / Mesopotamian.

It would be impossible for any one or all on this list to be 100 percent Khazar.

Of course the true origin of each and every Being is the Great Spirit over ALL NATURE.

Khazars are similar to the Chuvash, and are related to the people of Bulgarian descent.
